² Department of Informatics, University of Oslo

The Norwegian Informatics Conference (NIK) has been arranged yearly since 1988. This 33rd version of NIK was organized by the University of South-Eastern Norway. Sundvolden Hotel was the planned venue for the conference but during the fall of 2020, it was decided that the conference should be the first all-online NIK conference because of the Covid-19 outbreak.

NIK is a widely scoped national conference for dissemination of research and advanced development work within informatics. The conference calls for submission of papers from a diverse set of genres and topics – within theoretical as well as applied informatics. NIK is also open for cross-disciplinarity and diversity with regards to methodological approaches and application areas.

NIK is recognized as a level one publication channel in the Norwegian Register for Scientific Journals, Series and Publishers. The proceedings are published in the Open Journal Systems hosted by Bibsys. This year there were 18 papers submitted for review. The program committee accepted 12 papers in total.

As co-chairs, we would like to thank the authors for their contributions and the organizers for their efforts to ensure a well-run conference despite the Covid-19 outbreak.
