The NORwegian CONference on the use of IT in Organization (NOKOBIT) has been arranged yearly since 1993. This 29th version of NOKOBIT was organized by the NTNU in Trondheim as part of NIKT 2021.

NOKOBIT is a widely scoped national conference for dissemination of research and advanced development work within information systems. The conference calls for submission of papers from a diverse set of genres and topics. NOKOBIT is also open for cross-disciplinarity and diversity with regards to methodological approaches and application areas.

NOKOBIT is recognized as a level one publication channel in the Norwegian Register for Scientific Journals, Series and Publishers. The proceedings are published in the Open Journal Systems hosted by Bibsys. This year there were 21 papers submitted for review. All papers received 3 reviews. The program committee accepted 12 papers in total. In addition two posters were presented.

As co-chairs and proceedings chairs, we would like to thank the authors for their contributions and the organizers for their efforts to ensure a well-run conference despite the ongoing Covid-19 pandemic.
